**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 8, 9, 10-21, and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bates, US 20020157896A1 in view of West, US 5172683 and Graf, CH000690545A5. Bates teaches connector 40 for holding a stethoscope, reflex hammer and penlight comprising a first and second portion 51, locking aperture 57 at the end of the first portion and a locking hook 58 at the end of a second portion. Each portion comprising a flange having two half portion, which when cooperates the other portion defines a first slot adapted to receive the penlight and a second slot adapted to receive the elongated portion of the stethoscope. Bates does not teach a portion for displaying indicia and pen with disinfectant spray.
3. West teaches stethoscope warmer (connector) having pocket 68 adapted to receive and retain the elongated tubular portion 54 of the

stethoscope and having a second pocket 70 adapted to hold heating element or storage container 70. The heating element stores chemicals.

4. Graf teaches a pen with means for writing and a reservoir containing a liquid disinfectant.

5. It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the device taught by Bates with information or indicia on the outside surface as taught by West to provide a means of conveying written message or for providing certain aesthetic effects. In addition, it would have been obvious to substitute the pen taught by Bates with a pen with writing means and disinfectant spray as taught by Graf to provide a means not only to write any necessary information but to disinfect the stethoscope after each use.

***Allowable Subject Matter***

6. Claims 29-34 are allowed.
